## NEW PRODUCT

### 'Fix-A-Nail'

**Affordable Cold Laser Device for use in small practices and home use**

HNC 905nm Cold Laser Therapy Device to treat fungal nail infections which combines pulse laser radiation and blue light energy, resulting in a synergetic therapeutic effect.

Affordable, painless and convenient: It will not hurt or cause pain when treating the onychomycosis. Easy and quick to use, just clip onto the nail and relax for 7 minutes.

Each infected nail should be treated at least once a day. Maximum of 3 daily treatments. Treatment duration may vary between individuals, depending on age, severity of infections and so on. Estimated treatment duration is about 2-3 months.

Class II equipment type B  
Laser Wavelength 905nm  
Blue light wavelength 470nm  
Laser intensity 25w  
Charging time 2-3 hours  
Device operates for 7 minutes

**\$199.00** Per Unit
