

SURGICAL SUPPLIES

NEW SILKPEEL DERMALINFUSION

This NEW treatment has taken America and the UK by storm and is now available in New Zealand.

This non-invasive 3-in-1 dermatological treatment simultaneously exfoliates, extracts and infuses the skin with condition specific serums for immediate and long lasting results on all skin types.

**SILKPEEL®
DERMALINFUSION™**

SIMULTANEOUS 3-IN-1 TECHNOLOGY
FOR OPTIMAL SERUM DELIVERY

		
EXFOLIATES REMOVAL OF DRY, DAMAGED SKIN CELLS	EXTRACTS DEEP CLEANSING OF SKIN SURFACE AND PORES	INFUSES DELIVERY OF CONDITION-SPECIFIC SERUMS DEEP INTO THE SKIN

**VOLUMIZES
SKIN BY 70%**

ENVY MEDICAL®
Integrative Skin Therapy™

The Dermalinfusion system uses diamond tip exfoliation (that's right, real diamonds) to deliver the latest form of skin resurfacing technology. Where as traditional microdermabrasion emits a spray of loose aluminum oxide crystals above the skin's surface, Dermalinfusion uses diamond tips to evenly and gently to abrade each area of skin, placing Dermalinfusion at the pinnacle of professional skin resurfacing technology.

A 30 minute procedure can be used on any skin type to treat skin conditions such as:-

- * Dark spots, age spots, sun spots
- * Acne and blemishes
- * Dry Skin
- * Sun Damaged
- * Ageing skin
