## PODOLOGY ABRASIVE CAPS

### THE SMART ALTERNATIVE TO SANDING DISCS LUKAS- ABRASIVE PODO RANGE

These orange coloured PODO Abrasive Caps are single (patient) use and come in various sizes and grits. Simply place onto the Cap Carrier (which replaces the common mandrel), these also come in various sizes and ensures the cap is held firmly in place during treatment. The cap is then easily removed when needed.

LUKAS PODO has been proven to be more efficient & time saving than comparable instruments.

- No more risk of cut injuries
- A safe choice for Diabetes patients
- Callus removal is significantly faster & gentler on the patient leaving the skin wonderfully smooth
- The non-stick effect greatly reduces attachment of skin residues to the cap surface
- Large quantities of callus can be removed without exchanging the tool
- Only slight pressure is required when using the PODO system reducing operator fatigue
- Significantly better price compared to milling tools and diamond cutters
